

An existing Cast-in-place structure that needed to be retrofitted by cutting one bay from East to West full length. The former inside columns became perimetral after the partial demolition. The need of a new restraint system that could be attached to the existing columns / slab put our barrier cable system in the spot. Being the lighter system available, and because of the ventilation and natural light that it allows, we only had to engineer and execute it. Featuring end and corner frames, end brackets, and different intermediate supports, this structure provides covered parking area to the adjacent office building.

PROJECT: Reston Executive
(November 2017) Reston, VA

CLIENT: L.F. Jennings, Inc

ARCHITECT: Streetsense

OWNER: The JBC Companies
