

We were approached with the challenging task of providing a Barrier Cable System that could go from floor to ceiling.

A great deal of coordination with other trades, and the need of fine tune every aspect of the system requiring endless hours of analysis, all to ensure a successful result. We were proud of the planning but even more of our Team in the field that executed the installation with precision.

Expanding over 8 levels and spaced every 4" O.C., 214 cables were used to achieve the Design Team envisioned system. With additional perimetral cables, our non-forgiving challenge was completed in less than a month.

**PROJECT:** The Mark  
(December 2019) Atlanta, GA

**CLIENT:** Landmark Properties, LLC

**ARCHITECT:** CNNA Architects, Inc

**OWNER:** Landmark Development
